📍 pune

SUMMARY

I have two years of experience creating scalable, high-performance web applications and am a highly motivated Node.js developer. I am very knowledgeable about technologies like Node.js, Express.js, MongoDB, and others. I love to write clear, effective code, and I have experience creating REST APIs and utilising third-party APIs.

EDUCATION

B.E In Electrical Engineering

Sri sai collage of engineering and technology

📅 2017 - 2019

PROJECTS

AIT Portal Development

📅 04/2022 - 10/2022   📍 pune

Similar to the Zoho app, the AIT portal provides a wide range of services pertaining to employees, including HR management, payroll processing, time and attendance tracking, and employee self-service.

- I provided support to the team by designing and developing APIs for the portal using Node.js technology. I leveraged the capabilities of Node.js to create robust and efficient APIs that met the project's needs. On the database side, I implemented MariaDB and took responsibility for creating the database architecture. This involved designing the structure of the database and ensuring optimal organization and storage of data for the project.

HIG (Hartford Insurance Group)

📅 11/2022 Jun-2023   📍 pune

Hartford Insurance Group (HIG) is a leading provider of insurance products and services to individuals and businesses across the United States. They offer a range of insurance solutions, including property and casualty, life and health, and group benefits. HIG is committed to delivering exceptional customer service, and their online system for claims is a key part of this effort.

- Explored about DataDog Monitoring and have a basic understanding of how it works.
- Worked on documentation of OpenText Print Lambda and QnA validation Lambda and got it reviewed
  by senior members.
- Collaborated with team members and up skilled in lambda development, writing test cases and working
  on the code coverage and various AWS Services.
- Proficient with AWS Services: Lambda, SQS, DynamoDB, Cloudwatch, API Gateway.
- Familiar with the introductory knowledge of AWS S3 Service.
- Currently focusing on understanding the new coding standards to write code, creation test cases &
  attaining the standard code coverage.

PROJECTS

Shiperone

📅 07/2023 - 10/2023 📍 Pune

Experienced with Shiperone Workflows, a cutting-edge platform tailored to streamline every aspect of supply chain management. Proficient in leveraging its capabilities to eliminate logistical complexities, expedite assignment and execution of shipment tasks, and harness the power of data-driven insights for enhanced decision-making. Dedicated to enhancing stakeholder proficiency while adapting to the modern era of supply chain excellence.

- Utilized Node.js capabilities to craft efficient, robust APIs tailored to meet specific project requirements.
- Assumed responsibility for the implementation of MS SQL on the database side.
- Orchestrated the design and structure of the database architecture, ensuring optimal data organization and storage for project success.

NEERA

📅 10/2023 - Present 📍 Pune

NEERA, a comprehensive employee management solution, offers an extensive array of services designed to streamline various aspects of HR operations. Its capabilities span human resource management, providing tools for efficient HR administration, employee onboarding, and personnel record-keeping.
One of NEERA's standout features is its cutting-edge use of AI technology in the recruitment process. The platform leverages AI-powered resume filtering, enabling organizations to sift through a large volume of resumes quickly and effectively.

- The successful outcome from implementing NEERA's services in our organization was a significant enhancement in overall human resources management.
- NEERA successfully streamlined our HR processes, making employee onboarding, record-keeping, and payroll processing more efficient and accurate.
- One of the most notable successes was the integration of AI technology for resume filtering in our recruitment process. NEERA's AI-driven resume filtering proved to be a game-changer, allowing us to sift through a large pool of resumes swiftly and identify top candidates more effectively.
